

## Demand for gold and silver has been growing extremely

8 March 2022, Prague – The demand for precious metals has been growing extremely in response to current geopolitical events. Large investors and private individuals use gold and silver as a safe store and a guarantee of the value of their money.

IBIS InGold has massive reserves of physical gold and silver. Therefore, more and more people have turned to the company in recent days to buy these investment metals, because it was one of the few companies in Europe able not only to fix the price of these metals, but also to deliver them almost immediately.

High demand and still unusually long delivery times of partner refineries and mints have caused that, as of today, IBIS InGold will not ship most newly fixed coins and bars immediately, but only after they are produced and delivered from the refinery or mint. Shipments will be made in the same order in which the individual ingots and coins have been paid for by customers.

**Payment processing and price fixing continue without any restrictions.**
