

IBIS InGold is celebrating another milestone. We have already provided a safe harbour to 40,000 customers.

14th May 2020, Prague – IBIS InGold, the number one in the field of savings in investment gold, has reached another milestone. The company exceeded the number of 40,000 customers and helped them invest in precious metals.

People who have included gold in their portfolios save money in a long-term prosperous asset while protecting themselves from inflation and economic crises.

“IBIS InGold trusts gold and we are convinced that this is an investment that makes sense especially today and which belongs to all family portfolios. Betting everything on one card does not always pay off, therefore, it is important to select different types of assets,” Libor Křapka explains, chief executive officer of IBIS InGold, while adding *“we appreciate the confidence of our customers, and we will continue with innovations which will make investing in physical investment gold and other metals comfortable for them. Many thanks to all our partners who help us fulfil our vision while supporting their clients in gaining security and financial independence.”*

Investment gold generally pays for a safe haven in the field of investment. Its price rises in times of crisis and, unlike cash, it does not lose its purchasing power even at the time of inflation. In the long run, the value of the precious metal is still growing.

About IBIS InGold

IBIS InGold is a leading gold and silver trading broker. It has been active on the market for over 20 years. It is a European leader in savings plans investing in gold and silver. Simple and flexible savings plan, known as iiplan®, with contributions as low as EUR 4 per month is available to the public.

The main offer of the company is created mainly by investment gold ingots from prestigious Swiss Refinery PAMP® with the weight from 1 to 1,000 grammes and investment gold coins from Australian refinery “The Royal Australian Mint” with the weight from 1/10 ounce to 1 ounce. IBIS InGold also offers products from other world mints – The Royal Canadian Mint and The Perth Mint. They deliver their products throughout Europe.

IBIS InGold® cooperates with a wide network of significant independent financial-consulting companies in the Czech Republic, Slovak Republic, Poland, Slovenia, Austria, Germany, and Hungary. Thus, the offer of IBIS InGold products and services is available to clients in all regions. Complex services and education of starting and experienced investors and consultants are a matter of course. They provide its clients as well as partners with perfect information and analytical services.
