

More than 50,000 clients have already bought gold and silver from IBIS InGold

26th April 2021, Prague - There is an increasing interest in investment gold and the number of customers that invest in gold with IBIS InGold has exceeded 50,000. Precious metal brings an interesting return in the long run – on average 10 % per year, in addition, it helps investors overcome the impacts of inflation, but also the economic crisis, which are currently gaining momentum.

“The fact that over 50,000 clients regularly buy from us is great news. It shows us that our products and savings schemes work and really help people ensure better value for their money in the long run. At the same time, we see that our goal of making gold an affordable investment is being met,” says Libor Křapka (Executive Director of IBIS InGold).

Investment gold definitely has its place in family portfolios. In 2019, its price increased by 20 %, in the last year by another 17 %. According to IBIS InGold, its price should be doubled in the next five years. In addition, however, it functions as a universal world currency while maintaining its value. It therefore protects savings very well against inflation as well as the impacts of economic crises.

IBIS InGold brings first-class goods to its clients. In addition to Lady Fortuna ingots from the prestigious Swiss PAMP Refinery, there are also Britannia investment coins from one of the oldest mints ever, The Royal Mint.
