

## IBIS InGold expands its investment silver offer

June 1, 2022, Prague - IBIS InGold is expanding its offering of investment ingots from the PAMP Refinery. Customers can now invest in a 1,000g silver cast PAMP ingot.

*“Despite the fact that investment silver is burdened with value added tax, it has its supporters among our customers. Due to the incredibly high demand for investment gold, refineries prefer processing this metal, and the availability of silver ingots and coins is decreasing. This was the reason why we started negotiations with the PAMP Refinery on delivering cast silver ingots, and it is precisely one-kilogram silver ingots that are very popular with our clients,”* explains Petr Špičák, Marketing Director of IBIS InGold, the reason for adding the new product to the offer.

The cast silver investment ingot extends the range of goods and customers can obtain it both with a one-time purchase and with gradual purchases in iiplan® savings.

*“The high demand for precious metals is reflected in their unavailability and customers often have to wait for their delivery. Thanks to the excellent relationships and direct links that IBIS InGold has with both PAMP Refinery and The Royal Mint, we do not have to deal with a similar problem at this time. We have sufficient stocks of investment ingots and coins and our customers purchase investment ingots and coins without restrictions and longer delivery times,”* adds Petr Špičák.
