

New mobile app for gold payments and gold account management

10 July 2024, Prague | Respect for tradition, love for innovation. That just about sums up the new IBIS InGold app. The app has been given new features and a radically new design, offering users simple, intuitive control. It is available for both iOS and Android devices.

The IBIS InGold app is currently designed primarily for customers who use products that include a weight accumulation account (i.e. iiplanGold[®] and iiplanRentier[®]). After downloading and installing the app, they can link it to their user account. Their mobile device will then display a dashboard that provides a summary of their gold accounts, transactions, available balances and other information. Multiple user accounts can be managed with this one app.

"We are bringing our customers a modern, secure app that will give them an overview of their gold portfolio and so much more. Whether they're saving for retirement, their children's future or a new home, it's all literally at their fingertips," says Petr Špičák, the company's Marketing Director.

The IBIS InGold mobile app even offers active operations, opening up a world of safe and simple online gold transfers.

"Users can use the app's QR code with the ,Pay Me' functionality to make quick online gold transfers. All they have to do is scan the generated QR code and then confirm the transaction. Both parties can instantly see that the gold has been transferred smoothly," says Petr Špičák, adding: "We will keep adding new features to the app and want to make it available to all our customers. Our top priorities are customer-friendly usability, impeccable service, efficient management and easy handling of gold reserves."

The IBIS InGold app uses a cutting-edge data protection system that integrates advanced encryption and biometric authentication. This comprehensive approach to security ensures that all client transactions and personal data are protected according to the highest standards of digital security. iOS 12.4 or Android 8.0 or higher is required for seamless operation.

IBIS InGold is ushering in a new era of investment in precious metals. The app builds up reserves in a traditional, centuries-tested and safe asset using modern technology, offering its customers maximum convenience in the management and use of their reserves.

About IBIS InGold

IBIS InGold is a leading trader in investment gold and silver, with a market presence stretching back more than 25 years. It has become one of Europe's foremost providers of gold and silver savings solutions.

IBIS InGold offers the general public simple, flexible savings under the brand names iiplan[®], iiplanGold[®] and iiplanRentier[®], giving them the opportunity to make incremental purchases of precious metals starting at amounts as low as EUR 4. The company regularly updates and upgrades its product line-up so that, besides its traditional tried-and-tested gold and silver buying options, it also offers customers flexible, highly liquid services that do not tie them down at all.

IBIS InGold is an official authorised business partner of the PAMP refinery in Switzerland and The Royal Mint in the UK. This direct business partnership with both the most prestigious refinery and the most prestigious mint in Europe is a guarantee for all customers that the investment gold and silver they buy will be of the utmost quality.

IBIS InGold provides its customers with the best possible service, whether they are purchasing or re-selling investment metals. It guarantees that they are the first holders of the investment bars and coins they are purchasing. The great advantage of products from the PAMP refinery is that the origin and authenticity of investment gold can be verified by means of unique VERISCAN[™] technology. It also guarantees all customers that it will buy back the investment coins and bars it sells. On top of the metal buyback price, it even pays a buyback premium.

IBIS InGold, together with its business partners, the PAMP and The Royal Mint, is committed to the highest standards of fair trade and social responsibility.
